-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 August 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Election/Restrictions

Claims 1-8 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected group, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on August 26, 2004. The limitation of “**the hub portion** having a uniform thickness” (cl 1, line 6) is limited to Fig. 1 while “the coupling portion” (cl. 9) is limited to Fig. 6.

Applicant's election with traverse of Group II in the reply filed on August 26 2004 is acknowledged. The traversal is on the ground(s) that there is no serious burden. This is not found persuasive because it is a serious burden on the Examiner to have to examine numerous patentability distinct inventions having numerous and diverging issue of patentability, especially when a patent application is limited to one invention.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 9-11 rejected under 35 U.S.C. 102(b) as being anticipated by Mokdad (US 5711191).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

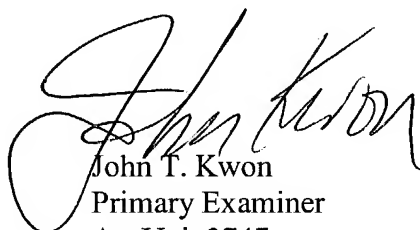

Claims 12-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mokdad (US 5711191). Mokdad discloses a flywheel mounted on crankshaft (34) by a coupling means (32). The differences between the prior art reference and the instant invention are the additional shaft and the condition of the surface. It would have been considered to be an obvious choice of mechanical design because one skilled in this art is familiar with basic flywheel structures and normally has the laboratory test facilities. To optimize or select the suitable shaft and the surface would be within the ability of ordinary skilled in this art.
